## Kids Against Hunger

By Melanie 3<sup>rd</sup> Grade, with help from her Dad

Azevada School packed lunches for kids in Fremont who need lunch. In February, when I went to school, we had a play about Kids Against Hunger. Our school needed money to pay for kids who have difficulty getting lunch.

Instead of asking for money to donate, I earned it. For example, I did chores like cleaning the bathroom and shredding paper. I worked in the garden work by mowing the yard and pulling weeds.

I also had some money so I donated \$25 and the next day I brought it to school. We packed 24 food bags for kids who need it.

I remember this day because it was also my birthday.

This is my other art that I made. I hope to inspire everyone. We can keep our hearts happy. By Josiel 3<sup>rd</sup> Grade

## Brianna's Riddle, 3<sup>rd</sup> grade

Question: You can catch me but you can't throw me. What am I?

Answer: A cold

Poems submitted into the Young Poet's Anthology 2020

**Spooky Bat**

By Vedanshi 3rd grade

Spooky bat! Spooky bat!  
Would you care for a chat?  
No, No, No, I am in a rush  
to decorate the Halloween bush!  
Spooky bat! Spooky bat!  
Are you leading the pack?  
Yes, Yes, Yes, you are right!  
I am leading the pack tonight!

**War**

By Veda 3rd grade

It's time to fight crime.  
It's right to fight war in time.  
We failed in the past.  
But not this time.

**Nature**

By Soham 3rd grade

Nature is good in life.  
Nature could be also danger.  
or  
Is the beauty of the world?  
Don't kill nature.  
Be courageous with nature.

**Martin Luther King Jr.**

By Gael 3rd grade

Martin Luther King Jr.  
Had a dream  
For all to be free  
Like the wind breathes.

### The Crazy But Nice Year

By Marissa, 3<sup>rd</sup> Grade

Roses are red, violets are blue,  
My name is **Marissa**.

How are you?

Today is a good day  
and today the sky is blue.

The wind is blowing,  
the flowers are growing.  
The sun is not that yellow  
but the grass is instantly  
turning greener.

With all this Quarantine  
my dad is turning meaner.

As soon as this is over  
he will be back to  
Being sweeter.

### Jen's robot

By Jennifer, 3<sup>rd</sup> grade. Revised by Ms. Gillet

I (Jen) created this robot prototype with assistance from my mom. Constructed with two medium sized boxes and one smaller box, we resourced a ROV (Remote Controlled Vehicle) toy car to motor it. The robot's name is Alex who is wrapped in paper to improve appearance. Alex's purpose is to assist others.

### What is your favorite season? Why?

By Neo, 3<sup>rd</sup> Grade

My favorite season is summer because I like summer break! My family and I go camping at Lake Camanche every summer. It is really enjoyable spending four days at the lake with my family and friends. I like summer because it doesn't rain or get cold. I can play outside and I get to swim. These are most of the reasons why summer is my favorite season.

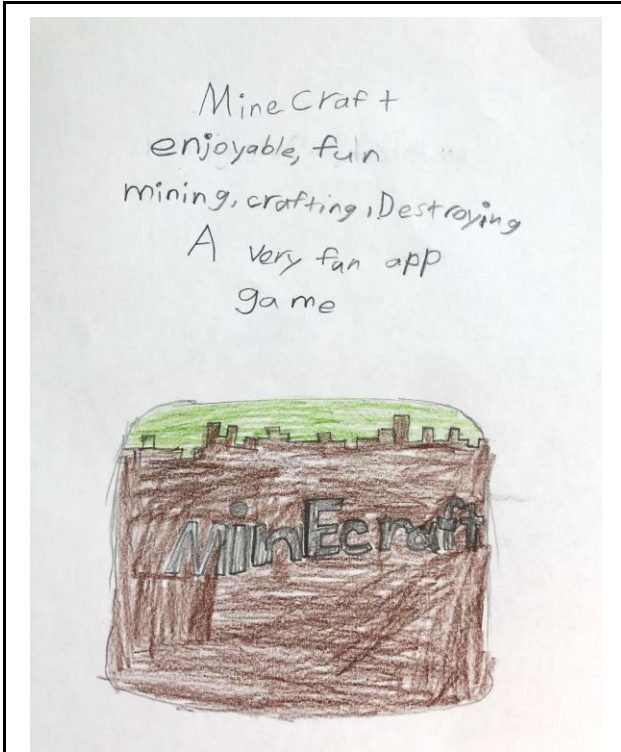

### What I Am Learning

By Josiel 3<sup>rd</sup> Grade

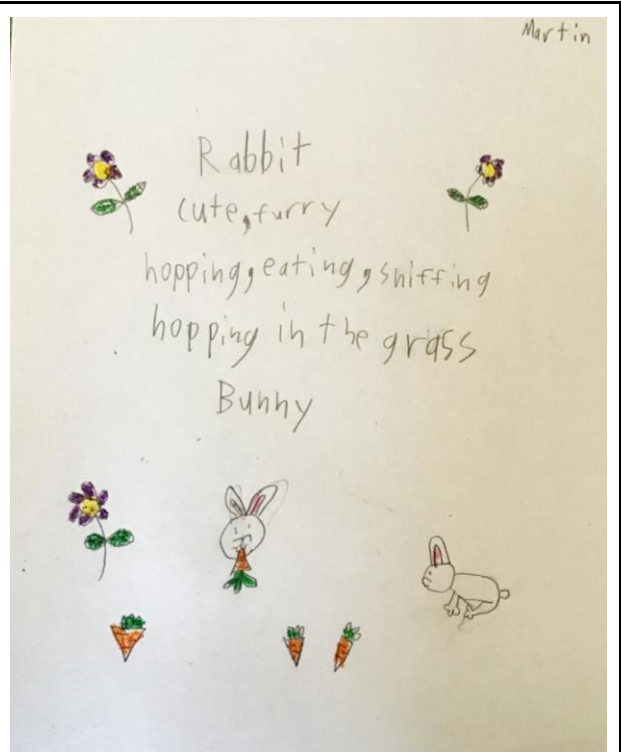

I become a stronger learner by reading important books like Science, Benchmark, Math Expressions, and by doing all the activities in them. Lexia helps me get better in writing and reading, especially in understanding the meaning of the concept. It helps me get better ideas. Reading practice skills on the computer help me to read fast and type better. When I have Zoom meetings with the classroom, I learn math concepts like equivalent fraction and how to divide the whole into fraction parts.

Q - What did the number zero say to the number eight?

A - Nice belt.

**Vedanshi's Riddle 3<sup>rd</sup> Grade**

Q - Where can you find cities, towns, shops, and streets but no people?

A - The map

### Visiting Stanford

By Vedanshi, 3<sup>rd</sup> Grade

My experience at Stanford was enjoyable. In January, I went to Stanford with my parents to attend an open session. At first, we were having trouble finding a parking space but we luckily got one. As we were walking down the street we found Mrs. Gillet who led the way to the training hall.

The professor was waiting outside the hall. Since we reached early, we waited with the professor in the hallway. When we entered the room, it was beautiful. It had a lot of chairs, tables, and expensive audio-video equipment. The professor was a kind and charming person.

Soon students started pouring in. All of the students sat on the chairs with their friends. There were many college kids with different backgrounds. Some of the students were chatty while others were quiet. Then another professor joined in with the first professor.

The session was about how we can help disabled people using technology. The first part of the session was the introduction of professors and students but the second part was the introduction of the problem we were going to solve. After the class, professor served cookies to us. Finally we said our goodbyes and left. So, I enjoyed going to Stanford as I got to meet the big class.
